

BMS & EPMS Turnkey Excellence for Every Building, Every Sector

NEW PROJECTS

We are new construction project experts

At ABEC we have the knowledge, capabilities and experience to deliver tailored solutions for the largest and most complex new build and refurbishment projects. This includes major commercial developments, cutting edge data centres and specialised sectors such as healthcare and manufacturing. We are trusted partners of some of the world's largest blue-chip corporations as well as government organisations.

A simplified service for clients

We provide a complete suite of Building Management Systems (BMS), Electrical Power Monitoring Systems (EPMS) and IT Services, including system design, simplifying the process for clients by removing the need to manage and coordinate separate suppliers.

On new projects we are there every step of the way from project inception through to completion and beyond. Our collaborative approach and drive to go the extra mile helps ensure we can successfully deliver projects regardless of the technical and logistical complexities.

We find the right solution for every project

With over 20 years' experience in BMS and building services integration, we can deliver a solution that meets the requirements of each and every project. There is no one-size-fits-all solution. We seek to fully understand the requirements and take a system agnostic approach, recommending the products that meet the client's needs. We work with leading BMS and EMPS equipment suppliers and can integrate different equipment to provide truly seamless Single Pane of Glass solutions.

OUR MAJOR PROJECT EXPERIENCE

ABEC has delivered projects of varying sizes and complexity in a wide range of buildings in many vertical markets, including: commercial offices, data centres, life sciences & bio-chem, manufacturing, healthcare, education, housing, and finance as well as government and local authorities.

We have a global reach with local support

- ABEC is the ideal partner for projects with international elements.
- Our Account Managers are allocated to clients not regions, so you have one point of contact.
- We share our knowledge across our global teams, so clients benefit from the latest best practice approaches.
- We have delivered large-scale projects across the UK, Europe and Middle East from our locations in the UK, Ireland and Qatar.

We are award winning

We are proud to have been recognised many times for our design, installation and service expertise, with the BCIA Award for Building Controls & BEMS Installer of the Year being among the most recent.

Why partner with ABEC?

- ✓ More than 20 years' experience
- ✓ A one-stop-shop for BMS, EPMS and IT installation services
- ✓ Global reach with dedicated local support
- ✓ System agnostic to always offer the best product to suit the client's needs.
- ✓ Collaborative and transparent approach
- ✓ Trusted partner of leading corporations and organisations around the world
